Clients **270+** Locations **8,300+**  
Scales shipped **1,560,000+**  
Inventory Under Management **\$4.2 BILLION**

## OUR CUSTOMERS

# WHETHER THE CHALLENGE IS LABOR, STOCK OUTS, INACCURATE OR INCOMPLETE ORDERS, CALL DOWNS OR COMPLAINTS, **THE SOLUTION IS TO AUTOMATE INVENTORY MANAGEMENT.**

Sending teams of staff out to count thousands of SKUs in dozens of locations every day was never efficient or particularly accurate, and now, it isn't tenable. As labor costs continue to rise and clinical service demands increase, you must evaluate the merits of fully automating your inventory management.

## *What's the good news?*

### ***Your health system's leadership believes in automation.***

Whether it is pharmacy, surgery, food service, linen or laboratory, chances are your organization has been investing in automation for decades. Investment in healthcare automation is a proven response to rising demands for quality and to address increasing labor costs. System-wide inventory management is the next logical automation investment.

And as you consider your options, you'll quickly realize that PAR Excellence offers the only differentiated solution in the market – completely hands-free, accurate, always on, real-time visibility of all your inventory. Everywhere.

## WHY DO LEADING PROVIDERS CHOOSE PAR?

- PAR's scales have a predictable ROI of 6-22 months
- The expected useful life of a PAR scale exceeds 15 years
- 99% of all PAR scales ever installed are still in use (since 2008!)
- Once shipped, PAR scales never require calibration

## Weight. Don't wait. **PAR Excellence.**
